MovieAPI 1.0 OAS 3.1

/openapi.json

API for Movies, Ratings and Users

Authorize

Users

POST `/register` Register

Register an email, name and password and display email and username

Parameters Try it out

No parameters

Request body required application/json

Example Value Schema

```
{
  "username": "string",
  "password": "string",
  "email": "user@example.com"
}
```

Responses

Code	Description	Links

Code	Description	Links

201	Successful Response
	Media type
	application/json
	Controls Accept header.
	Example Value Schema
	{
	"email": "temp@gmail.com",
	"id": 5,
	"username": "tempUser"
	}
		No links

409	Username already exists	No links
422	Validation Error	No links

POST `/login` Login

Login to current account to recieve JWT token, to perform actions for your account or admin controls

Parameters Try it out

No parameters

Request body required application/x-www-form-urlencoded

grant_type

`string | (string | null)`
pattern: ^password$

username * required

`string`

password * required

`string($password)`

scope

`string`

client_id

`string | (string | null)`

client_secret

`string | (string | null)($password)`

Responses

Code	Description	Links
201	Successful Response Media type **application/json** Controls Accept header. **Example Value** Schema `{ "access_token": "LIST OF CHARACTERS", "token_type": "bearer" }`	*No links*
400	Invalid Username	*No links*
422	Validation Error	*No links*

GET `/users` `/{user_id}` `/overview` Read User

Can view usernames and emails of other users

Parameters Try it out

Name	Description

Name	Description
user_id * required integer *(path)*	user_id

Responses

Code	Description	Links

200	Successful Response
	
	Media type
	application/json
	Controls Accept header.
	
	Example Value Schema
	
	{
	"email": "temp@gmail.com",
	"id": 5,
	"username": "tempUser"
	}
		No links

400	Invalid Input	*No links*
404	User not found	*No links*
422	Validation Error	*No links*

PUT /users /{user_id} /update Update User

Change username, password or email, but verifies if they are changing their username and email

Parameters Try it out

Name	Description
user_id * required integer	user_id

Name	Description
(path)	

Request body required

application/json

Example Value Schema

```
{
  "username": "string",
  "password": "string",
  "email": "user@example.com"
}
```

Responses

Code	Description	Links
200	Successful Response Media type application/json Controls Accept header. **Example Value** Schema `{ "email": "temp@gmail.com", "id": 5, "username": "tempUser" }`	*No links*
400	Invalid Input	*No links*
401	Not Authorised	*No links*
422	Validation Error	*No links*

DELETE `/users` `/{user_id}` `/delete` Delete User

Current User deletes thier account

Parameters

Try it out

Name	Description
user_id * required integer *(path)*	user_id

Responses

Code	Description	Links
200	Successful Response Media type application/json Controls Accept header. **Example Value** Schema `{ "Message": "Deleted User", "email": "temp@gmail.com", "id": 5, "username": "tempUser" }`	*No links*
401	Not Authorised	*No links*
404	User not found	*No links*
422	Validation Error	*No links*

Movies

POST `/movies /create` Create Movie

Admins create a new movie

Parameters Try it out

No parameters

Request body required

application/json

Example Value Schema

```
{
  "director": "first and last name of director",
  "genres": "list of genres (must be a valid genre)",
  "name": "Year of release",
  "revenue": "total revenue to the pound",
  "runtime": "runtime in minutes",
  "summary": "350 character descriptor"
}
```

Responses

Code	Description	Links
200	Successful Response Media type application/json Controls Accept header. **Example Value** Schema	*No links*
400	Genres aren't Valid	*No links*
401	Not Authorised	*No links*
422	Validation Error	*No links*

```
{
  "id": 0,
  "name": "string",

          "review": "string"
        }
      ],
      "message": "string"
    }
```

401	Not Authorised	*No links*
404	Movie not Found	*No links*
422	Validation Error	*No links*

Ratings

POST `/ratings` `/{movie_id}` Create Rating

Current user creates a review and stores it to their account for said movie

Parameters Try it out

Name	Description
movie_id * required `integer` *`(path)`*	movie_id

Request body required application/json

Example Value Schema

```
{
  "rating": "rating between 1 and 5",
  "review": "100 character review"
}
```

Responses

Code	Description	Links
200	Successful Response Media type application/json Controls Accept header. Example Value Schema `{ "id": "rating id", "movies_id": "id of movie being reviewd", "rating": "rating between 1 and 5", "review": "100 character review", "users_id": "id of users making rating" }`	*No links*
401	Not Authorised	*No links*
404	Already Reviewed Movie	*No links*
422	Validation Error	*No links*

GET `/ratings` `/{rating_id}` Read Rating

Search for certain reviews via its id and the user who made it

Parameters Try it out

Name	Description
rating_id * required `integer` *(path)*	rating_id

Responses

Code	Description	Links

Code	Description	Links
200	Successful Response Media type **application/json** Controls Accept header. **Example Value** Schema	*No links*
404	Rating not Found	*No links*
422	Validation Error	*No links*

```
{
  "id": "rating id",
  "movies_id": "id of movie being reviewd",
  "rating": "rating between 1 and 5",
  "review": "100 character review",
  "users_id": "id of users making rating"
}
```

PUT `/ratings /{rating_id}` Update Rating

User can update their reviews for certain movies

Parameters Try it out

Name	Description
rating_id * required `integer` *(path)*	rating_id

Request body required **application/json**

Example Value Schema

```
{
  "rating": "rating between 1 and 5",
  "review": "100 character review"
}
```

Responses

Code	Description	Links
200	Successful Response Media type **application/json** Controls Accept header. **Example Value** Schema	*No links*
401	Not Authorised	*No links*
404	Rating not Found	*No links*
422	Validation Error	*No links*

```
{
  "id": "rating id",
  "movies_id": "id of movie being reviewd",
  "rating": "rating between 1 and 5",
  "review": "100 character review",
  "users_id": "id of users making rating"
}
```

DELETE `/ratings` `/{rating_id}` Delete Rating

Users can remove their reviews

Parameters

Try it out

Name	Description
rating_id * required `integer` *(path)*	rating_id

Responses

Code	Description	Links
200	Successful Response Media type **application/json** Controls Accept header. **Example Value** Schema	*No links*

```
{
  "id": "rating id",
  "message": "Deleted Review",
